
what is the most necessary components?

Posted by anat - 2007/11/12 22:36

in your view, for a joomla website?
thanks and good luck with this site :)

i always start with the SEF component:
<http://www.web-code.org/joomla-components/sef-urls-for-joomla.html>
then its really up to you, whatever you need in your site.
the SEF is really necessary for Google and others to make sense of your URLs.
