

Best free Wordpress Themes

Contributed by Administrator
Thursday, 25 December 2014

Here I will try to gather some of the best sites for free (and good) WordPress Themes.

Best themes are ones with good graphics, that you can see that the designer made an effort and didn't just created something easy.

Good themes also have extra features built into them, like RTL support, easy eCommerce support and more.

1. Colorlib - a very good theme collection I've used many times.
2. wpexplorer - Some very nice themes
3. smthemes - a wide variety of free WordPress themes
4. andersnoren - a graphic designer with some really nice themes
