JavaScript Escape / Unescape Converter is a web based internet tool. Used for escaping and unescaping text in which certain characters have been or will be replaced by hexadecimal escape sequences. This is mostly used when past data through URI string.

An example: unescape text : hello world ? escape text : hello%20world%20%3F

```
{jumi [javascript/links.html]}  
Escape Tool{jumi [includes/jumi/escape.php]}
```
