

## Related items module for Joomla

Contributed by Administrator  
Monday, 05 May 2008

This module add links at the buttom of every content item to other related content items.

It's easy to install and it works great. You can see it in action in every article in this website.

There are a lot of options to configure and you can make a lot of changes to the look and feel of this module.

To download and install click this link:
