Last Updated Thursday, 12 March 2009

This module adds a very simple yet effective image scroller to your site.

You can use it vertical or horizontal, on any image folder you have.

It allows you to choose the images size and the direction of rotation.

You can see an example here: <http://adverfix.com/>

Click here to download it: <http://joomlancode.org/gf/project/expose/frs/>

(Its the file named: mod\_expose\_scroller\_3.0beta3.zip)
